

Auvé VitaComplex Serum

"For years, I had breakout-prone skin with uneven tone. During those years, I mistakenly believed that a great deal of effort and many steps were necessary to get clear, supple skin.

VitaComplex Serum was the first product I ever created after working for years as a scientist, performing research and development for top worldwide skin care and cosmetic companies.

I learned through my development of VitaComplex Serum that skincare should and can be very simple, fitting automatically and easily into one's hygiene routine like combing hair or brushing teeth.

VitaComplex Serum is intended to be straightforward and complete. Maximum effects are possible through use of just one product.

This product has been my most successful. The visibly restorative effects thanks to VitaComplex Serum were my inspiration and my guide in developing the rest of the Auvé skincare product line."

*Angella Sprauve
Founder, Auvé*

Auvé VitaComplex Serum is concentrated with vitamins C and E. These powerful antioxidants are scientifically proven to reduce the appearance of fine lines and protect against wrinkles.

The serum contains visible vitamin C which is rapidly absorbed when applied, finishing skin texture to a smooth and ravishing sheen. This serum, applied over a freshly clean face mornings and evenings, is best used under moisturizer for luminous, silky-soft skin.

VitaComplex Serum delivers a multitude of remarkable effects simultaneously, including the diminishing of fine lines, hydrating, smoothing and evening out texture and coloration.

The serum helps to fill in thin lines and small wrinkles, making the application of makeup much easier. It glides on feeling like a soft facial massage.

Ten percent of funds from every VitaComplex Serum sold is donated toward Auvé College Scholarships awarded to disadvantaged and underrepresented college students, supporting their academic goals in math, engineering, and science. This scholarship program is affiliated with 501c3 non-profit MESA (National Mathematics, Engineering, Science Achievement). While in college, Auvé Founder Angella Sprauve and her brother were each awarded MESA scholarships that made it possible for them to graduate college and pursue careers in science and engineering.
